Professional Summary

Mr. Asit Kumar Swain is having more than 12 years of working experience in various construction & maintenance project, out of which 10 years worked in the Oil & Gas field. Having worked Oil & Gas ptojects, Petrochemical plants, Alumina refinery and cement plant for construction and maintenance jobs. He is having tremendous experience in Business Development & Tendering, Project scheduling, Manpower planning and identifying resource requirements. Liaison with client, third party & sub contractors, alumina refinery and cement plant Construction, Maintenance and shut down projects in oil & gas field. Execution of EPC projects related to Oil & Gas, Power & Petrochemical sector. Coordination with design consultants & vendors for ensuring smooth integration of the engineering, procurement and construction activities. He is having experience in Project Management from Construction phase to Commissioning phase, including Construction, Sub-contract Manpower & Equipment Management in the field of Oil & Gas projects, capacity expansion plant of oil refinery sectors, shut down project of petrochemical plants.

Experience :

Jan 2007 to June 2023	**WORKED WITH MM INFRA ENGG, KSSIPL, RELIANCE, THYSSENKRUPP, TRISHAKTI ENGG., LAKSHYA POWERTECH, CR3 INDIA AND PRESENTLY IN WORLY INDIA PVT LTD.**
Client Handled	Reliance, IOCL, BPCL, ACC Cement, Utkal Alumina
JAN 2023 To JUN 2022	**CR3 INDIA PVT. LTD IN RELIANCE REFINERY, JAMNAGAR, GUJARAT.** **CPP maintenance and shut down job** **As a Maintenance engineer**

	Participate in regular meeting with client to planning of next day jobs, job issues, and delays of work to ensure timely completion of same day work. Preparation of work specification for intime handover of particular job and ensures working strategy, plans, specifications, methods and procedures are in accordance with scope of work and pre-qualifying them for work. Calibration of workers skillness for respective jobs and also safety awareness. Coordination with our planning and maintenance team and ensuring the distribution of job and documentation to concerned Engineers/ Supervisors in regular basis. Reviewing the comments and consolidated for issue of maintenance job. Review and approval of documents as required for contract / purchase orders for equipment and required consumables relating to maintenance job. Participating in technical discussion /clarification meetings with c l i e n t s / Vendors. Ensuring cost-effective solutions and applications of value added in the area of construction strategy throughout the assigned projects. Preparation of monthly valuation & additional (VTC) claim and responsible for technical and commercial coordination with client and subcontractors. Meeting with client representative to resolve issues related to contract. Liaison with Client & Subcontractor for work progress and Variation to Contract. Attending weekly/ monthly progress meeting with client and our planning department. Supporting Planning Department to develop PMT (Progress Measurement Techniques) for maintenance activities and in analyzing of critical path and critical activities. Preparation of Management Report highlighting Achievements and Area of concern. Shut down monitoring & reviewing, control of time & cost. Preparation of Progress Report with financial, Manpower/ Equipment Mobilization status, S-curve / Cash flow Histogram. Developing Schedule Network for planning, Engineering, periodic maintenance, pre shutdown job using computer based technique
DEC 2021 to May 2022	**Lakshya Powertech pvt. Ltd, at IOCL, Paradip, Odisha.** **Propylene unloading compressor house project.** **As a Mechanical engineer**

	Executed all type of mechanical works like erection and alignment of structures,roof sheeting and final inspection of erected structures before handover the project to client. Also controlling of manpowers, tools, consumables and mechineries and lifting equipments for structural job. Participate in regular meeting to identify problems, target dates, issues, and delays execution of work to ensure timely project completion. Preparation of work specification for subcontracting purpose and ensures contractors construction strategy, plans, specificatioons. Review and approval of documents as required for contract / purchase orders for equipment and materials relating to the projects. Ensuring cost-effective solutions and applications of value added in the area of construction strategy throughout the assigned project. Preparation of working budget for project. Meeting with client representative to resolve issues related to contract / project. Attending weekly/ monthly progress meeting with client and subcontractor. Supporting project planning dept. for a better progress of work. Project monitoring & reviewing, control of time & cost. Preparation of Progress Report with financial, Manpower/ Equipment Mobilization. Developing Schedule Network for Design, Engineering, Procurement, Construction / Erection & Commissioning phases of project using computer based technique
Jan 2019 to Nov 2021	**TRISHAKTI ENGG. WORKS, PARADEEP, ODISHA.** **Project: PEB erection at plastic park and strl. Work at IOCL)** **Mechanical Engineer(fab. and erection of structure/PEB erection)** Preparation of work specification for fabricatoin and erection of structure. Fit up check of faricated structure like columns, beams, bresdings, ladders, handrails etc. Also involving with roof sheeting and QC check of painted structure, controlling of manpower, tools, consumables and equipment handeling etc. Assembly, erection and alignment of structure as per proper given standard. Mark no./ drawing no. wise Stacking of structure in stackyard and co ordinate to sub contractor for elevation wise member marking for erection.

	Coordination with sub contractor manpower team for a high prigressive work with maintening all safety rules and regulations. Review and approval of documents as required for contract / purchase orders for equipment and materials relating to the projects. Participating in technical clarification meetings with client/sub contractor. Ensuring cost-effective solutions and applications of value added in the area of construction strategy throughout the assigned projects. Preparation of daily working plan for Contractor and safety review. Preparation of monthly RA bill to client and take responsible for early release. Daily review meeting with Subcontractor for work progress maintening safety and quality. Attending weekly/ monthly progress meeting with client and subcontractor. Supporting site Planning Department to develop work progress and analyzing of critical path and critical activities. Project monitoring & reviewing, control of time & cost. Preparation of Progress Report with financial, Manpower/ Equipment. Developing Schedule Network for Design, Engineering, Procurement, fabrication / Erection & Commissioning phases of project using computer based technique
Oct 2017 to Sep 2018	**Thyssenkrupp Ind India pvt. Ltd. At BPCL, Kochi refinery.** **Project: CHSP maintenance** **Technical Supervisor.** Attending daily and weekly meeting with client for maintenance. Supporting maintenance team to prevent break down of plant for any type of maintenance activities and in analyzing of critical path and critical activities for running plant. Preparation of maintenance Report/ maintain DPR highlighting target Achievements over per coke loading in wagon and trucks. Daily/Weekly review meetimg wiyh shift in charge/RCM for shiftwise maintenance work and ,Preparation of Progress Report with Manpower/ running Equipment status. Conducting/ follow up the periodic maintenance of belt conveyor and tube conveyor equipments and periodic check of equipments in daily basis for a better running of CHSP.

July 2014 to Apr 2017	**Reliance Corporate IT Park Ltd., Reliance Refinery, Jamnagar.** **Project : J3 Project. (RPMG)** **As a Fab. Shop Engineer I have executed my job** Successfully completed 12000 MT structure fabrication for SEZ gasification project with SFS ream in Reliance j3 project. Fit up check of fabricated structure like columns, floor beams, tie beams, bressings, ladders, handrails etc with final inspection of fabricated structure. Also worked for inspection of structure painting, QC check, DFT checking of painted structures, paintvdata sheet check, adhession test,identify of painting defect etc. Taking responsibility for mark no wise and drawing no. Wise dispatch of fabticated structure from fab yard to paint yard for painting and then dispatch to erection site in priority basis. Attending weekly/ monthly progress meeting with SFS team and subcontractor for better progress. Supporting site Planning Department for updating of fabrication work and dispatched structures to erection site with proper documantation.
Jan 2011 to June 2014	**Kazstroy Service Infra. India Pvt. Ltd.** **Project : IOCL, Paradip Refinery Project, Odisha.** **As an Engineer(structure)** **Looked after** the fit up check and final inspection of columns, beams, bressings, floor beams and tie beams for pipe rack of IOCL project and all erection activities of pipe rack (9000MT). Also estimation of raw materials, reconsilation of steel,controlling of manpower, tools, consumables and machineries for fabrication and erection,billing check of sub contrctor with mobilization of hydra and cranes for structure erection. Have took responsibility of sub contractor mibilizing for erection of structure with areawise distrubution of etrction drawings as per contractor ability for a better progress and equipment distribution. Attend meeting in weekly basis with client/PMC and planning team for discussion of all activities of project and resolving of site problems.
Jan 2007 to Dec 2010	**MM Infra Engineering Pvt. Ltd.** **Project: (a)ACC Cement plant capacity expansion Project, Bargarh, Odisha**

	and (b)Utkal Alumina Int. Ltd, Project., Rayagada, Odisha. **As an Engineer** Preparing of all project related activities for fabrication and etection of structure. Fit up check and final inspection of fabricated structure like columns,conveyor gallery, truss, roof purlins, tie beams, flooor beams, bressings, ladders and handrails etc for cement plant and alumina refinery plant. Also Discuss with sub contractors in daily basis for any type of doubt and modification in drawings for fabrication as well as resolve it through client engineering deoartment. Conducted all erection activitied by staying physically in site for a better progresss of job. Preparing Daily progress report and weekly sub-contractors billing etc.
